RB MULTI-MAT™ NON-SLIP SURFACING

Your customers will find thousands of uses for the RB Multi-Mat Non-Slip Surfacing. RB Multi-Mat display and cutting system accommodates two rolls, one 1/4" and one 3/8" thick. Your customers will instantly see the utility of the product whether it's for a pad under their Bar-B-Q, a mat for in front of their work bench, or perhaps a non-slip mat for a traffic area on a slippery deck. The uses are endless and your customers will really appreciate that they can buy just what they need for their project.

The RB Multi-Mat retail display rack holds two rolls and comes with a retail sign and safety cutting system. The display and cutting system can be easily assembled and operated by your sales staff. Install an RB Multi-Mat display rack today and your customers will immediately find uses for this durable and versatile matting product.

As with all of the products manufactured by RB Rubber Products, Inc. the RB Multi-Mat is made from recycled scrap tires and a proprietary polymeric binder system.

Makes a great retail presentation!

RB CONSTRUCTION FLOORING

RB Construction Flooring™ is a **reusable** and safe recycled rubber flooring option for protecting concrete and other finished floors. RB Construction Flooring™ will protect your floor from dropped tools, scissor lifts, and of course, heavy foot traffic. It will also eliminate tripping hazards created by warping masonite. RB Construction Flooring™ lies flat, even when wet. It will not warp, fall apart or become slippery when exposed to water. Reuse RB Construction Flooring™ by simply sweeping or hosing off and transporting to your next jobsite.

RB WALKWAY ROOF PADS™

The RB Walkway will withstand severe weather and offers excellent traction for the user – even when wet.

The RB Walkway is compatible with built-up or single-ply roofing and when spaced correctly will not dam water. Every pad carries a 5 Year Limited Warranty.

Roof manufacturers recommend walkway pads in all areas of high traffic or when servicing roof top equipment is required at least once a month. Walkway pads are required at access doors, roof hatches, ladders, etc. REGARDLESS of the traffic expectancy.

RB Rubber Walkway roof pads meet the federal recycling & waste reduction guidelines required under Executive Order 13101, Greening the Government.

Available in thicknesses of 3/8", 1/2" and 3/4" and a wide variety of widths and lengths.
